IMPORTANCE OF ALBANIAN PORTS LIKELY TO GROW

If Austrians Capture Them, Trade With Inland Is Expected Soon to Increase Materially.

(Associated Press Correspondence.) Sofia, Bulgaria, May 10.—The occupation by the Austro-Hungarians of Durazzo and their efforts to gain possession of Avlona, has called attention to the commercial importance of these two Albanian ports. Both have in recent years enjoyed prosperity despite the fact that the political and economic conditions in Albania were not the best. Exports and imports of Durazzo had in 1913 a value of 5,400,000 francs, but fell in 1914, owing to the war, to 7,100,000 francs. The total port traffic of Avlona in 1913 was 4,400,000 francs. In 1914 this fell to 3,500,000 francs.

Durazzo imports iron, steel, coal, textiles, machinery, arms and ammunition, rice, wine and tropical fruits, the factory products coming almost entirely from Austria, while the last three items constitute the bulk of the Italian trade. Exports are lumber, lemons, cereals, eggs, skins and olive oil, reaching in 1913 a total value of 2,200,000 francs, of which 71 per cent went to Austria and 23 per cent to Italy, the remainder going elsewhere.

Avlona's trade is about the same character, though in this case the Italian and Austrian interests are on nearly the same footing. Albania has virtually no industries. In the two years preceding the outbreak of the war the attempt was made to develop the country in this respect. Several small factories were established but were closed when the war started. Near Durazzo several brick yards are still in operation, as are also a few small lumber mills. Avlona has some oil presses, and an asphalt mine near Selanika, whose product was formerly shipped to Trieste, Hamburg and Rotterdam.

If the Austro-Hungarians capture Avlona and Durazzo, the latter may within a few years have railroad communication with the interior of Albania and points beyond. Several lines have been decided upon tentatively. One of them runs from Sid through Herzegovina and Bosnia to Avlona, costing not less than 200,000,000 Austrian crowns. A projected Avlona-Durazzo-Avlonia line would cost 25,000,000 crowns.

Don't You Feel Well, Ache All Over?

Feverish? Feel as though your blood was hot? Cold feet? Backache? Those warning signals which indicate that "a bad cold" or the grip is coming on! Don't get discouraged, but go home, on the way stop in any drug store and get Dr. Pierce's Golden Medical Discovery in tablet or liquid form.

When you get home take a hot bath or a hot foot-bath, go to bed, cover up warm—take a dose of the "Golden Medical Discovery," in the morning another dose, and you will feel better. You will not have to continue many doses before you are well.

It will replace all the bad blood it drives out, with rich, pure blood full of vital force. It will furnish you with the kind of blood that increases energy and ambition, that puts the entire body in such perfect physical condition that brain or muscles know no fatigue.

It will clear the skin; eczema, pimples, rash, blotches will dry up and disappear; boils, carbuncles and other evidences of tainted blood will pass away, never to appear again.

Get Doctor Pierce's Golden Medical Discovery at any medicine dealer's to-day, in either liquid or tablet form as you prefer. It's the one great blood maker.

There is no Alcohol in this great tonic to shiver up the red corpuscles. An alternative extract, made of herbs and roots, it goes about its work in Nature's way.

Send 10 cents to Doctor Pierce, Invalids' Hotel, Buffalo, New York, for large trial package of Tablets.

'L' COLLISION IS BEING INVESTIGATED

(BY MORNING JOURNAL SPECIAL LEASED WIRE.) New York, June 8.—A grand jury investigation was begun tonight into a rear-end collision today between two elevated railroad trains, in which one person was killed and fifteen were injured, some perhaps fatally. Edward Grove, the trolleyman on duty at the scene of the crash, was arrested on a charge of homicide after a coroner's inquest. Coroner Flynn announced that Grove admitted the signals were clear for the trolleyman of the rear train to proceed, thus permitting it to crash into the rear of a stalled express train on the Third Avenue "L" at 149th street.

Flames which burst almost immediately from the wreckage did not gain much headway, as firemen with ladders soon ascended to the structure and extinguished half a dozen or more fires which broke out at various points.

FAVORS NEUTRAL CARE FOR WAR PRISONERS

(BY MORNING JOURNAL SPECIAL LEASED WIRE.) London, June 8.—The Daily Graphic, discussing the alleged hardships of British prisoners in Germany, suggests that the prisoners of all the belligerent nations be transferred to neutral countries and be paid for by the respective governments.

The Graphic urges the United States to take up the matter to the extent of making a special appeal to the German government to agree to such an arrangement.

Endeavors Meet

East Las Vegas, N. M., June 8.—The state Christian Endeavor convention began here this afternoon and will continue in session tonight and tomorrow morning. Devotional exercises were held this afternoon, led by Rev. Archie Woodhaker of Albuquerque, president of the state Endeavor association. Mrs. Linus Shields of Jemez Springs read a paper on "Efficiency." Miss Jessie Hafner of Velarde spoke upon "Junior Work in New Mexico." Rev. C. C. Cordeiro, pastor of the First Christian church of this city.

Boy Accidentally Killed

Santa Fe, June 8.—Word comes from Carzon, Moscoso county, that Walter Baumgartner, aged 12 years, was accidentally shot and fatally wounded by his brother. The wounded boy was rushed to the miners' hospital at Raton, but died upon arrival there.

School Head Resigns

Santa Fe, June 8.—The department of education was informed today that V. O. Hall, superintendent of schools at Roswell and president of the New Mexico Educational association, has resigned and will leave New Mexico, going to the Wisconsin normal school at Milwaukee as principal of the training department. He is a graduate of the Wisconsin normal school.

TRENCH RAIDS CALL FOR REAL 'MANHANDLING'

Boxing, Wrestling, Fencing, and Mob Tactics Brought Into Play; Fists Often Better Than Gun.

(Associated Press Correspondence.) British Headquarters, France, May 26.—Between the British and German modern machine warfare, wherein every man was supposed to have become a pawn without initiative of his own has been developing perhaps the deadliest form of short imagination can conceive—where every combatant places his cunning, his strength and his skill in hand to hand fighting against those of his adversary.

Hardly a day passes that there is not a trench "raid" by one side or the other, and sometimes several such sallies. No subject is more taboed in its details by the censor. Commanders do not want to let the enemy know why their raids succeed or fail or why the enemy's succeed or fail.

All the elements of boxing, wrestling, fencing and mob tactics plus the stealth of the Indian who crept up on a camp on the plains and the teamwork of a professional baseball nine are valuable to the player.

The weapon that is least needed is a rifle. A club or a sandbag or an Indian battle axe or spiked club is better. A good slinger without any weapon at all may take an adversary's loaded rifle away from him and knock him down and then kick him to death.

The monotony of trench existence these days is broken by preparing for raids and against them. Battalion commanders work out schemes of strategy which would have won them fame in smaller wars. Fifty men or a thousand may be engaged in a raid. It may be on a front of fifty yards or a thousand. Its object is to take as many prisoners and kill and wound as many of the enemy as possible in a few minutes, and then to get back to their own trench. The assaulters try to hold on to the piece of trench they have taken, the guns are turned on them, the bombers close up on either side, and machine guns and rifles are prepared to sweep the zone of retreat.

Curiosity Is Incentive. An unquenchable curiosity gives the soldiers incentive for the raids. Ordinarily they never see their enemy hidden in his burrows. "Men's land" from their own burrows. Unseen bullets from unseen snipers crack overhead. "Unseen guns suddenly concentrate in a deluge of shells. For months this sort of thing goes on and the trenches of the adversaries remain in the same place. The grim monotony of casualties and watching continues. This arouses the desire to "get out" the enemy which the trench raid satisfies. It means springing over the parapet and rushing across "No Man's land" into the very houses of the enemy and man to man on his door step proving which is a better fighter.

To go over the parapet ordinarily means death. In order to make any such rush there must be "interference" as they say in football, and the barbed wire in front of the enemy's trench must be cut. This is usually done by the guns, which become more and more deadly in their ability to turn accurate sprays of destruction on given points. They cover the rush and they cover the return of the raiders with their prisoners.

Blows Better Than Shots. But the guns are not all there is of all kinds of organized trickery in order to enable a body of soldiers to get into the enemy's trenches for a few minutes of activity, when the occupants throw themselves on the invaders at such close quarters that it is a question if even a revolver is now a practical weapon.

Thrown over a traverse and a bomb can. Running into a German around the corner of a traverse, a blow may be better than a shot. There have been trench raids where every man who went out was responsible for a casualty or prisoner while the raiders' own loss might not have been one in ten to the enemy's. There are also failures. Success requires that every detail should work out right. The British inaugurated trench raiding which the Germans promptly adapted. Where its development will end no one dares venture to say. One advantage of any raid is that those who return are bound to bring back some information of value to the intelligence corps.

Corset Saves Life

Officers in the trenches as well as officers in other military units saved by their steel corsets as a protection against spent bullets.

"Score one for the breastplate," said an officer who had been doubled over by a shell fragment which hit him in the abdomen. Instead of a flow of blood crimsoning his blouse all that was visible through the rent in the cloth was an abrasion on a steel surface.

"But for your new corset you would have been dead by now," the surgeon told him.

Early in the war an officer who wore protection of this kind would have been frowned on by his fellows as unsoldierly. A type of corset of small plates of highly tempered steel joined together by steel wires is being more and more worn by officers.

Its structure adapts itself to the movements of the body, it weighs only a few pounds and, fitting snugly as a vest, it is not cumbersome. If the son of Lord Shaftesbury, president of the Canadian Pacific railway, who was killed recently, had been wearing one his life might have been saved, according to his comrades. Since then Canadian commanders have strongly urged all their officers to buy corsets.

Bullet Must Be Spent

The corset is worse than no protection against bullets unless the latter are spent. Such is their power of penetration that they go through the thin steel "moustache" and make a larger wound than if nothing had been in their way. But in the trenches, unless one shows his head above the parapet and is moving about in the shell zone in the rear of the trenches, one is rarely exposed to bullets. When an officer goes into a charge in face of machine gun and rifle fire he takes off his corset.

On average days in the trenches the main danger is from shrapnel bullets and fragments from shell explosions which may inflict infinitely more wounds preventable by comparatively thin protection to such a vulnerable substance as human flesh. Together, a corset and a steel helmet pretty effectively shield vital parts against missiles of low velocity.

The use of the corset is limited virtually to officers who pay for them out of their own pockets. The expense and labor of supplying all ranks of a great army with them would seem out of the question. But gradually all the British soldiers are being supplied with the steel helmets after their successful use by the French, who first introduced them. The French pattern is quite graceful beside the British, which round and something the shape of a football. The British is heavier than the French and there is method in its soup-plate grotesqueness. Thanks to its form a bullet which strikes it in front, instead of going through the head as is the case with the French helmet, glances and follows the inside of the helmet, passing out at the rear.

TO ASK WITHDRAWAL OF PUNITIVE EXPEDITION

(BY MORNING JOURNAL SPECIAL LEASED WIRE.) Laredo, Tex., June 8.—Prominent American merchants plan to hold a meeting in St. Louis in the near future to prepare a petition to President Wilson asking that the American punitive expedition be withdrawn from Mexico, according to a local Spanish newspaper.

The newspaper points out that since the trouble started in Mexico, American merchants have suffered a financial loss of more than \$50,000,000. Withdrawal of the American troops would tend to pacify the situation, the newspaper says.

SATO IS SELECTED AS JAPANESE AMBASSADOR

(BY MORNING JOURNAL SPECIAL LEASED WIRE.) Washington, June 8.—Amato, Sato, former Japanese ambassador to Austria, has been selected as ambassador to the United States to succeed Viscount Gihon, whose transfer to the ambassadorship at London recently was announced. Word of the selection reached Washington tonight.

At present Mr. Sato is in Tokio attached to the foreign office, where he has been stationed since his re-
